EDUCATION & CERTIFICATIONS:

Full Stack Java Angular Development   **2023 - Present**
Youcode Youssoufia | UM6P

Oracle certification professional - Java SE 17   **Oct 2024 - Present**

Oracle certification associate - Java SE 08   **Jan 2025**

TECHNICAL SKILLS :

Front End :Angular, HTML, CSS, JavaScript, Bootstrap, Tailwind.
Back End :Java, Jakarta EE , Spring Framework, Spring Boot .
Database : Mysql, Postgres.
Test & Documentation : JUnit, Mockito, Postman, Swagger .

Version Control: Git , Jira .
CI/CD :jenkins **,** sonarqube , Docker , Maven
Conception tool: Figma , lucidchart

PROFESSIONAL EXPERIENCE :

Internship in Software Solution Development | TerabyteSoftware | Apr 2024 - Jun 2024

Tasks performed:

- Development and maintenance of Kaprol, a financing management application, optimizing its features with a team of developers to improve the user experience.
- Design of optimized user interfaces.
- Implementation of CRUD operations, enabling quick access to essential data for better organization.

Used Technologies: *Java SE , React , TypeScript .*

PROFESSIONAL PROJECTS:

HunterLeague   **Nov 2024 - Dec 2024**
Development of HunterLeague, a competition management application for hunting, optimizing APIs for instant registrations and consultations, as well as tracking member performance. I have worked with a database of 114 million entities, ensuring a smooth and efficient user experience despite the large dataset.
Technologies Used: Spring Boot - Postman - Docker - Postgres - Maven .

Citronix   **Nov 2024 - Dec 2024**
Design and development of Citronix, a lemon farm management application. This solution enables farmers to track production, harvest, and sales of their products while optimizing resource management. The application helps farmers better analyze the productivity of their crops. Additionally, I secured sensitive data by using the DTO design pattern, ensuring information protection and preventing any leaks.
Technologies Used: Spring Boot - Postman - Docker - Postgres - Maven .

DevSync   **Oct 2024 - Present**
A collaborative task management solution designed to improve team communication and efficiency. It offers advanced features such as tag-based search, automatic status updates, and optimized scheduling to facilitate coordination.
Technologies Used: *Jakarta EE - Postgres - Maven - Junit - JSP .*

LANGUES :

Arabic : Langue maternelle , **Français :** B2 , **Anglais :** B2 .
